Bed L=165 cm
H=78 cm
P=265 cm

Bed L=175 cm
with canopy H=215 cm
P=265 cm

Bedroom is the main setting for those who want to enjoy their own privacy, either couples or singles. Lovefool® has thought about this and created the bed **Hugme**, in two versions: with and without canopy.

The form of the bed follows the same smoothness of the rest of the product line, the bed-head comprise the armrest of the sofa Lovefool® and combines at the foot of the bed an exciting novelty: a projector which will allow you to watch again and again your amatory performances filmed by a set of web-cams that you can fix at the top corners of the canopy, or wherever you like. You will be the protagonist of a really hot movie!

Moreover for the most passionate lovers Lovefool® designers have put into the bed-head a nice gadget: thanks to an electric device and a remote control assuring complete functionality, **Hugme** allows you to enjoy the performance of a set of vibrators!

In addition to the classic vibration, the device combines movements which are adjustable in intensity and penetration through an angle of 180°.
